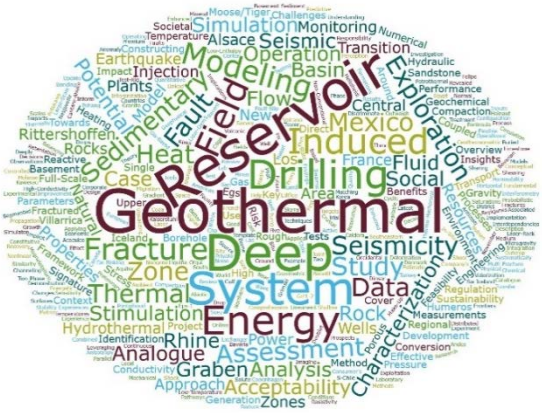
EGW 2019 7th European Geothermal Workshop Karlsruhe, 9-10 October 2019

Characterization of Deep Geothermal Systems

This workshop aims at discussing new approaches, methods or data in the fields of deep geothermal reservoirs for energy exploitation, with a strong focus on on-going research. It proposes a platform of scientific exchange, especially between PhD students and scientists.

TOPICS COVERED:

- Geothermal resources
- Exploration of geothermal reservoirs
- Geothermal wells
- Reservoir engineering
- Energy conversion systems
- Operation of geothermal systems
- Sustainability, environment and regulatory framework
- Computing and Data Management



CONFIRMED KEYNOTE SPEAKERS:

- Prof. Dr. Joseph Moore (Uni. of Utah) - FORGE Project
- Prof. em Dr. Ladislaus Rybach (ETH Zurich) - Sustainability of Geothermal Systems
- Prof. Dr. Inga Berre (Uni. of Bergen)

SIDE EVENT:

- Geothermal site visit: The Pfalzwerke geofuture GmbH invite us to visit their Insheim (Palatinate) EGS power plant on Friday morning, 11th October

IMPORTANT DATES:

- **26 Aug. 19:** Abstract submission deadline (approximately 500 words, fast-track review for non-European submissions)
- **24 Sep. 19:** Registration deadline

DETAILS: https://indico.scc.kit.edu/event/343/ - **CONTACT**: EGW2019@agw.kit.edu

Organized by Karlsruhe Institute of Technology

Scientific partners Université de Strasbourg, EERA European Energy Research Alliance

Sponsors Université franco-allemande Deutsch-Französische Hochschule, eucor The European Campus
